

The hidden charges for AT&T wireless is outrageous and nothing is said when you are signing up for a plan, then of course you don't receive an invoice (until after the expiration date of which you can't get out of the contract unless you pay AT&T \$200.00 PER LINE) I call every month about other hidden and added taxes that just happen to show up on my invoice. I have had other phone plans that I always knew how much they would be per month , period. Please help , maybe if you could get out of these contracts easier the company would hesitate pulling this on the consumers, also the taxes should be regulated or illegal. Thank you for helping.
